INDUSTRIAL SAFETY

## NEW LOOK & FEEL

DRIVER has always been passionate about worksite safety and always being visible on the job. We decided it was time to make a more bold and vivid identity that mirrors our dependable safety products. New logo; same unmatched quality and performance.

## OUR MISSION

To create and innovate dependable safety products for industrial applications. Our portfolio of brands help identify (ID) and safely secure vehicles and assets, protecting the people who work alongside them. We proudly manufacture our safety products in the USA for the harshest environments in the WORLD.

## OUR PURPOSE

At Driver Industrial Safety™, SAFETY IS ALL WE DO™. Our passion is to solve the critical need for well-engineered and dependable products for worksite safety. To ensure the best solutions, our innovation is driven by global partnerships and field tested in the world's harshest working conditions.

# SAFETY IS ALL WE DO™

Driver Industrial Safety™ is a quality manufacturer of market-driven industrial Safety Products for industrial and commercial industries. We are a privately owned and operated company headquartered in Phoenix, Arizona U.S.A. With manufacturing and warehouse facilities in the US, Canada, and Australia, we sell through our global distribution channels. Driver Industrial Safety™ was originally founded in 2004, under our former recognized name SafetyWhips®.

Our 5 branded product lines lead the industry in robust quality and engineering: NVIZN Identification Displays®, SafetyWhips® Warning Whips, Helios Warning Lights®, TORO® Heavy Duty Wheel Chocks, and Industrial Decals Co.™.

Our company was founded on the basis that there is a critical need for well engineered and dependable products for work site safety. Clients have come to Depend on Driver to keep their worksite safe. Our combined 100+ years in combined LED and electronics manufacturing provides the best engineered products available for worksite safety. While Driver Industrial Safety™ products have been poorly copied, we are still unmatched in performance and long-term durability.

Driver Industrial Safety™ is a Member of and Proudly Supports

# JOBSITE ACCESS OPTIONS

Product	Part Number	Brand	Options & Additional Information
1. General Purpose Wheel Chocks	WC-U0400 (x2)	TORO®	Models for Max. GVWs of 15 Ton (30,000lbs/13,607.77kg) to 40 Ton (80,000lbs/36,287.39kg)
2. X-MOD Series - Heavy Duty LED Beacons	HE-XB-HPA-W	Helios Warning Lights®	"Artificially Intelligent" with fully replaceable parts - Single & Dual Colors, Short & High Profile options
3. X-MOD Series - Heavy Duty LED Minibars	HE-XM-SPA-W	Helios Warning Lights®	Heavy Duty LED Minibar - Short Profile with Single & Dual Color options
4. Heavy Duty Window Mount	519.320-V	SafetyWhips®	For Powered, Light Duty Whips up to 8ft - includes Cigarette cord (519.320NP-V for NP whips)
5. Light Duty Warning Whips	ATV308-3-M	SafetyWhips®	3ft, (5/16") Non-powered "All Weather" Fiberglass Whips with Threaded Base (3/8" rods available)
6. Medium Duty Magnet Mounts	519.33LHR	SafetyWhips®	Mounting solution for Powered Whips up to 8ft with Threaded & Quick Disconnect options
7. Super Duty Warning Whips	SD05-X-30B-4CA	SafetyWhips®	5ft, Powered "All Weather" Fiberglass Whip with 16" Reflective "X" Flag & Heat Shrink Sealing!
8. Heavy Duty Angle Bracket Mount	ABM	SafetyWhips®	Permanent mounting solution for use with Threaded or Quick Disconnect whip base mounts
9. Heavy Duty Spring Mounts - powered	519.30B (zinc) / 519.309 (stainless)	SafetyWhips®	Heavy Duty Springs to help reduce whip breakage, prolonging your Safety Whip life!
10. Quick Disconnect Whip KIT - powered	SWQD-KIT-PT	SafetyWhips®	Includes Powered Whip Adapter & Powered Quick Disconnect Base with Pig Tail power lead
11. SC4 & SC3 Series LED Whip Lights	SC4-CA (constant) / SC3-A (amber)	SafetyWhips®	SC4 - High profile, Bright LEDs (flashing or non-flashing) / SC3 - Low profile, Super Bright LEDs
12. Heavy Duty Telescoping Warning Whips	TW13D-X	SafetyWhips®	13ft, Powered "Adjustable" Fiberglass Whips - Collapsible & Extendable with 3 Locking Sections!
13. Telescoping Whips Hitch Mount - powered	HMTDA	SafetyWhips®	Mounting solution powered via External Waterproof Connector (non-powered options available)
14. Heavy Duty Aluminum Stake Pocket Mount	SPM	SafetyWhips®	Universal fit with wedge application for both Threaded and Disconnect Whips
15. Industrial Traffic / Personal Safety	Varies	SafetyWhips®	3M Conspicuity Tape, Road Hazard Kits, First Aid Kits, Fire Extinguishers & Mounting Brackets
16. Super Duty LED Warning Whips	SDL06G-XY	SafetyWhips®	THE TOUGHEST All Weather LED Whip with pressure vent protection. Full top to bottom LED lighting!
17. Heavy Duty Fold Down Mount	FDM	SafetyWhips®	Heavy Duty Aluminum mounting solution to attach whips to tool box or back rack. Pull pin to fold down
18. Industrial Vehicle Identification Fleet Decals	Varies	Industrial Decals Co.™	Industrial Grade Fleet Decals & Fleet Management, Vehicle Magnetics, Safety Labels, Fire Tags
19. Light Duty, 3-Sided LED Backlit ID Display	VID-SA	NVIZN™	For pickup trucks/passenger vehicles - Reflective backing with Unit # and (3) Heavy Duty Magnetic feet

# NVIZN®

IDENTIFICATION DISPLAYS

- ➔ **NUMBER 1** Brand Choice for Leading Mine Sites!
- ➔ Globally Recognized for LED Identification Displays
- ➔ Supporting Standard Vehicles & Heavy Equipment
- ➔ Engineered with Advanced LED Technology
- ➔ Lowest Power Consumption in the Industry
- ➔ Lightweight & Easy to Install
- ➔ Maintenance Free
- ➔ Manufactured in the USA

# LED Programmable Vehicle Identification Displays

**Bright & Rugged LED Displays** ▪ **Most Dependable in the Industry** ▪ **Maintenance Free** ▪ **Field Tested for Over 17 Years!**

12", VID-3N12L-G shown above

NVIZN™ LED Programmable Displays are the most efficient form of LED displays Driver Industrial Safety™ has to offer. Recognized globally for dependability, high visibility, and programmable functionality. LED Programmable displays provide the most robust and efficient solution to identify any vehicle or heavy equipment especially under extreme, low visibility weather conditions. NVIZN™ products have proven to be the most visible enabling continuous Day and Night operation on countless mine sites with the luxury of no maintenance. We offer up to (5) characters within our Single-Framed displays for users to efficiently program multiple numbers, letters, or characters and/or messages for required equipment identification. Determine your Mounting and Distance Criteria™ (DC) requirements to ensure you select the right Type, Size or a Combination of displays to safeguard workers and site management so they are easily able to identify unit number, unit status, speed limit, payload weight, or otherwise, from afar. Count on Driver Industrial Safety™ to protect your valued Personnel & Assets!

VID-3C12-MBCA-A (without remote)  
VID-3C12-MBCA-A-KIT (with remote) shown below

(Also Sold Separately)  
VID-M3XCR

Up to 3 Characters - 17.25"H (438.15mm) x 35.25"L (895.35mm) | 12V to 24V | 25.5lbs (11.6kg) | 36 Watts

\*\* Must Purchase Communication Cable (VID-PC-COMM-60) per Display to link to unit \*\*

Message Board Communication Displays supercede all expectations of Smart Communication! Armed with advanced communication capabilities, this NVIZN™ product instinctively enables the built-in Smart Communication providing a seamless connection from the display to your intelligent software, device, or vehicle as needed. Many sites have the need to convey displaying the payload to the shovel operator as the truck is being loaded, vehicle speed limit, low battery alert, truck wash bay traffic signals and direction, and much more. These communication ideas our LED Message Boards relay are utilized on many industrial and commercial sites. Messages are pre-programmed to display ones Equipment Status, Arrows for Traffic Guidance along with various other communication requirement needs.

- Custom Programming
- Sealed System Display for Protection
- Real-Time Programming Capability
- External Waterproof Pigtail
- Message Vehicle Number Lock
- Easy Touch-Screen Controls
- LED Viewing Screen

BL2SIG6-24V-R/B (without remote)

Signal Light Displays are operational as a Signaling device to indicate a mode of operation of a vehicle, a direction of a vehicle, type of use of equipment, signal needs to others, a directional help on a site, or a vehicle is in use at that time. Driver Industrial Safety's NVIZN™ Signal Light displays use coloration such as "Red Light, Green Light" signaling to indicate use or directional flow of equipment, personnel or vehicle surrounding it when in use or indicate the function of vehicle needed for signaling others on site. Signal Lights provide color signaling uses which denotes what use it is being used at, such example as forward and reverse; or an autonomous mode or manual driver indicator, or to denote traffic direction such as stop or go, pass or do not pass by to bystanders alongside the vehicle(s) or intersections; etc.

- Available in 110V & 220V upon request (refer to factory for wire hireness)

# Heavy Duty Wheel Chocks

**Most Dependable in the Industry** ▪ **Tough Urethane Construction** ▪ **Manufactured in the USA** ▪ **Field Tested for Over 10 Years!**

We pride ourselves with the precision and rugged construction of our TORO® products. TORO® Wheel Chocks surpass quality standards and are all manufactured in the USA. Driver Industrial Safety™ hit the mark with its TORO® product lines; leading the industry in reliable and dependable chocking solutions for any type of vehicle or heavy equipment. TORO® chocks comply with multiple industry safety requirements including MSHA (Mine Safety and Health Administration), OSHA (Occupational Safety and Health Administration), NFPA (National Fire Protection Agency), DOT (Department of Transportation), SAE (Society of Automotive Engineers), and ANSI (American National Standards Institute) standards. We offer a variety of wheel chock structure styles to serve specific industry needs as well as ANSI compliant safety color and custom color options (General Purpose chocks only) for added support in providing safe and creative site-management solutions to ensure a safe working environment at all times.

Our **General Purpose** line of TORO® wheel chocks are engineered for quick and secure installation typically used for Land Vehicles such as trailers, pickups, utility vehicles, dual axle vehicles, and other standard size vehicles. Constructed with tough Urethane for lightweight and easy mobility, high visibility ANSI compliant safety colors and holes for mounting with rope, chains, or mounting brackets. All model styles are 3rd-party tested for compliance and support GVW's (Maximum Gross Vehicle Operating Weight) ranging from 15 Ton (30,000 lbs or 13,607.77 kg) to 35 Ton (70,000 lbs or 31,751.47 kg).

Our **Heavy Equipment** line of TORO® wheel chocks are heavy duty and engineered to safely secure Heavy Equipment Vehicles such as haul trucks, loaders, cranes, fire department vehicles, large military trucks, and heavy underground mining vehicles. Constructed with tough Urethane for lightweight and easy mobility with built-in strong carrying handle on the back side of each wheel chock. These large chocks are highly visible (ANSI compliant safety colors) with user-friendly mounting bracket options for quick and secure loading on the vehicle. All model styles are 3rd-party tested for compliance and support Maximum Payload Capacities ranging from 40 Ton (80,000 lbs or 36,287.39 kg) to 400 Ton (1,600,000 lbs or 362,873.90 kg).

70 Ton TORO® wheel chocks (part# WC-UY700) shown on a heavy equipment Loader

TORO® Wheel Chocks "User Safety" & "Proper Chocking Procedures" Guides available upon request!

## PROPER CHOCKING

**IMPORTANT SAFETY WARNINGS AND INSTRUCTIONS:** Wheel chocks are extremely effective safety tools providing optimum security when used correctly. Users must comply with all warnings, guidelines and instructions provided with each TORO® product. Wheel chocks **MUST BE** used in pairs, positioned downhill firmly against the tire and below the truck's center of gravity. Meaning, place a chock in front of both front tires if the truck is disabled and traveling down a grade, and in traveling up a grade while disabled place a chock in back of both rear tires of the truck. If the direction of the grade cannot be determined chock the front and back of one wheel. In severe conditions, it's necessary to use multiple pairs of chocks. Wheel chocks **MUST BE** positioned firmly and squarely against the center of the tire tread. If not properly positioned, the wheel chock will not be effective to its expected potential. These are generally accepted chocking procedures, and it is the responsibility of the end user to make the final determination of how the vehicle should properly be chocked based on the provided circumstances. Our main goal is to inform and educate users on how to properly use our TORO® wheel chocks. Testing & qualification is required for individual vehicles and for correct product selection to meet site requirements. Many factors **MUST BE** considered before selecting and using our wheel chocks. Advised Gross Vehicle Operating Weight (GVW) is a guide only. This will vary due to environmental factors. Please complete an adequate risk assessment before using the chocks. **DO NOT** use chocks if chocks are damaged. Perform regular inspections looking for cracking, chipping, and any other noticeable concerning physical malfunctions.

POSITION CHOCK TIGHTLY AGAINST TIRE TREAD

**3. TIRE SIZE**  
IDENTIFY the tire diameter of the vehicle to select the correct wheel chock needed.

**1. GROSS VEHICLE OPERATING WEIGHT**  
**MUST** understand the GVW of the vehicle to determine the necessary wheel chock for your specific requirements.

**2. MAXIMUM LOAD CAPACITY**  
Based per chock. Each chock is designed to handle a certain amount of Tonage. **MINIMUM** of (2) chocks required per vehicle.

**4. GROUND SURFACE**  
**BE AWARE** of the environmental conditions and ground surface the tires are exposed to.

# X-MOD Series Heavy Duty LED Beacons

**Multi-Voltage** ■ **Universal Easy Mount Design** ■ **Fully Replaceable Part Structure** ■ **Easy Configuration!**

**HE-XB-SPA-W** (shown above)

X-MOD Series LED Beacon mounted on vehicle rack  
(Permanent Mount, Short Profile - Amber Lens & White LEDs)

Driver Industrial Safety™ drove game changing innovation with its X-MOD Series heavy duty LED beacon line. Engineered with the most groundbreaking technology and design, the X-MOD Series stands apart from all market competition. Boasting quality, durability, and cutting-edge capabilities to ensure the right for various jobsite needs. For years, our Helios Warning Lights® products are known to deliver solid product performance, easy maintenance, and versatility. Helios Warning Lights® X-MOD Series portrays that and much more. Our X-MOD Series beacons are industrial strength, multi-voltage from 10 to 48vdc, meet Class I/II & California Title 13 Requirements, and designed with modular replacement options with enhanced “AI” capabilities. The light has “Artificial Intelligence” coding of an advanced CPU board to ensure the unit operates at all times and a fully encapsulated LED Driver Interchangeable Module for increased protection against extreme environmental conditions (dust, vibration, and moisture). All X-MOD internal components are protected with an impact resistant outer polycarbonate dust dome that has a smooth, dust-free finish that is very easy to clean. Our optically enhanced Fresnel lens design is revolutionary to the industry for leading-edge quality LED light output. Available in both Single and Dual Colors, with easy selectable colors and flash patterns!

**HE-XB-HPC-G** (shown above)

X-MOD Series LED Beacon shown with our SafetyWhips®  
4ft Super Duty Powered Whip and Heavy Duty Safety Flag  
(Permanent Mount Beacon, Short Profile - Clear Lens & Green LEDs)

The X-MOD Series Modular Replaceable Parts are a remarkable feature! Enabling you to manage your fleet of beacons with minimal replacement cost of replaceable parts versus buying a new beacon each time. Along with a fully replaceable part structure, X-MOD beacons are constructed with a Universal Easy Mount Design for use on all vehicles including Aluminum Bodied & “Ribbed” Roofs. The Aerodynamic and Ribbed “Easy Mount” Design provides superior performance for all vehicles and safely operates at speeds up to 75mph (121kmh).

Driver Industrial Safety’s X-MOD beacons are Made in the USA and backed by an industry leading 3-year limited warranty. Industrial industries such as mining, construction, and transportation experience harsh weather and working conditions which require a strong robust warning light. When it comes to extreme durability and adaptable warning lights, Driver Industrial Safety’s X-MOD Series has you covered!

# Super Duty LED Warning Whips

*The Toughest LED Whip Built To-Date!*

**SDL04G-XY** (shown with Green LEDs)  
4ft (1.22m), SafetyWhips® Super Duty LED Whip  
with 16" Orange Safety Flag with Reflective "X"

**Driver Industrial Safety™ exceeds all industry competition with our fully lit Super Duty LED Warning Whips!** Without a doubt, our SafetyWhips® brand of warning whips stepped up with this innovative product solution. The Super Duty LED Whip is a "must have" when your vehicle or equipment is experiencing Extremely Harsh weather conditions and in need of a highly visible, extremely durable, reliable, and weather-resistant whip solution. Built with safe & non-conductive heavy duty Fiberglass, these whips are Mine-tough™ and able to handle the worst of conditions. Engineered with advanced LED technology and constructed of a solid fiberglass internal pole with rugged polycarbonate external tubing for advanced protection against impact. SafetyWhips® Super Duty LED Whips allow other drivers to identify operating vehicles sooner, especially in low visibility environments. With standard whip lengths available from 4ft (1.22m) up to 10ft (3.05m), our customization options (custom sizes and LED colors) allow for more efficient workflow for your management team. Identify specific job functions, contractors and site personnel quickly. **Depend on Driver** to provide enhanced solutions for your site safety!

*10ft of protected LED lighting from top to bottom!*

# Telescoping Warning Whips: Powered & Non-Powered

The Collapsible, Extendable & Heavy Duty "ADJUSTABLE" Whip!

**TW11D-X** (shown on fleet of vehicles on site) 11ft (3.35m), SafetyWhips® Powered Heavy Duty Telescoping Whips with 16" Orange Safety Flag

**SafetyWhips® Heavy Duty Telescoping Whips** are extremely versatile and an excellent solution to maintain site safety during unforeseen circumstances when quick changes need to happen! Driver Industrial Safety™ succeeded with this Mine-tough™ whip solution with heavy focus on developing a heavy duty, highly visible, and very user-friendly product. With its "adjustable" capabilities these whips are especially advantageous for high traffic environments and quick change site management needs, which in turn maintains a safe site workflow. These whips are designed with durability and include (3) locking sections - (2) locks for quick and easy whip length adjustments and built with rigid wrapped Heavy Duty Fiberglass. 24 hour Vehicle & Equipment identification is key in our industry, which is why we constructed both Powered & Non-powered Telescoping Whips with collapsible lengths down to 79in (6.58ft/2m) and full extension up to 252in (21ft/6.40m). Outfit your fleet today with SafetyWhips® Telescoping Whips!

# Heavy Duty Warning Whip Bases & Adapters

Powered & Non-Powered Options Available!

## Whip Mount Bases

### Threaded Hex Whip Receiving Mounts (For use with Threaded Base Whips)

#### Steel Thread Mounts

- A. 519.343NP**  
Non-powered, Threaded Hex base
- B. 519.343-RCA**  
Powered, Threaded Hex Base with RCA Connection for quick power connection using included Hot Plug (Part#: HP.2, also sold separately)
- C. 519.343**  
Powered, Threaded Hex base with affixed Pig Tail single positive lead wire for power at the bottom for a solid hardwire connection

### Quick Disconnect Whip Receiving Mounts (For use with Quick Disconnect Whips)

#### Stainless Steel Quick Disconnect Mounts

- D. SWQDNP**  
Non-powered, Quick Disconnect base
- E. SWQD-PT**  
Powered, Quick Disconnect base with affixed Pig Tail single positive lead wire for power at the bottom for a solid hardwire connection
- F. SWQD-R**  
Powered, Quick Disconnect base with RCA connection for quick power connection using included Hot Plug (Part#: HP.2, also sold separately)

### Heavy Duty Spring Mounts

#### Non-Powered Springs

- G. 519.309NP**  
Non-powered, Stainless Steel Barrel Spring Base
- H. 519.30BNP**  
Non-Powered, .283 Zinc-Plated Barrel Spring Base (added resistance to corrosion)

#### Powered Springs

- I. 519.309**  
Powered, Stainless Steel Barrel Spring Base with RCA connection at bottom
- J. 519.30B**  
Powered, .283 Zinc-Plated Barrel Spring Base with RCA connection at bottom (added resistance to corrosion)

## Whip Mount Adapter Kits

\*Also Available - single adapters without a receiving mount\*

### Quick & Easy Conversion of Your SafetyWhips® Threaded Mount Base to a Quick Disconnect! (For use when converting 1/2" - 20 Thread whip connection to Quick Disconnect connection)

#### Non-Powered

- K. SWQD-KIT-NP (kit)**  
Non-powered, Stainless Steel Quick Disconnect Kit that includes Whip Adapter & Quick Disconnect Receiving Mount
- L. SWQD-WA-NP (adapter only)**  
Non-Powered, Stainless Steel Quick Disconnect Whip Adapter. Adapter threads to the base of a threaded whip to convert the end to Quick Disconnect

#### Powered with Lead

- M. SWQD-KIT-PT (kit)**  
Powered, Stainless Steel Quick Disconnect Kit that includes Whip Adapter & Quick Disconnect Receiving Mount with affixed Pig Tail single power lead
- N. SWQD-WA (adapter only)**  
Powered, Stainless Steel Quick Disconnect Whip Adapter. Adapter threads to the base of a threaded whip to convert the end to Quick Disconnect

#### Powered w/Detachable RCA Lead

- M. SWQD-KIT-R (kit)**  
Powered, Stainless Steel Quick Disconnect Kit that includes Whip Adapter & Quick Disconnect Receiving Mount with RCA connection using included Hot Plug (HP.2)
- N. SWQD-WA (adapter only)**  
Powered, Stainless Steel Quick Disconnect Whip Adapter. Adapter threads to the base of a threaded whip to convert the end to Quick Disconnect.

# Heavy Duty Warning Whip Mounts

Options for Powered & Non-Powered Warning Whips (Threaded or Quick Disconnect)

## Permanent Mounts

**Angle Bracket Mount**

**ABM**  
Heavy duty steel mount that works great with Powered and Non-Powered Whips, and whip Bases. Zinc-Plated for corrosion resistance.

*Attach whips to toolbox, rack or truck bed!*

**Fold Down Mount with Side Mount Attachment**

**FDSM**  
Heavy duty aluminum mount with various mounting solutions. Easily adjusts for right or left side mounting and able to fold down when whip is not in use.

**Universal Flat Surface Mount**

**FSM**  
Heavy duty steel mount - powder coated in black. Can be used with both Powered & Non-Powered Whips, Threaded or Quick Disconnect.

**Stake Pocket Mount**

**SPM**  
Heavy duty aluminum mount. Universal Fit with Wedge Application for larger trucks and pickups with stake pockets. Perfect for leased vehicles.

*No need to drill holes in vehicles for use!*

**Fold Down Van Mount**

**FDVM**  
Stainless steel mount with a locking spring pin. Versatile function locking whip in an up or down position.

*Used on side of vehicles, metal boxes, cranes*

**New Item!**

**Fold Down Horizontal Mount with Side Mount**

**FDHMS**  
Heavy duty Zinc-Plated mount with side mount attachment. Adjustable hole pattern with Locking Pin allowing users flexibility & versatile mounting angles to lay the whip on. Also creates more space for the wire on Powered whips.

## Temporary Mounts

\* Includes (3) 150# Pull Cup Magnets and Lifting Handle \*\* Includes (3) 150# Pull Cup Magnets

### Heavy Duty Magnet Mounts

Our SafetyWhips® Magnet Mounts are a heavy duty, non-destructive solution for temporary whip mounting. Reliable in avoiding any permanent physical damage to your vehicle or equipment especially great for leased equipment. All Magnet Mount options are built with (3) super duty Pull Cup Magnets for enhanced suction, handling maximum speeds up to 35mph / 56kph.

The **Quick Release** feature is the most popular option when ordering a Powered Magnet Mount!

**519.33LHR** shown with 3ft (.91m) Quick Disconnect Whip

**519.33LHR** \*  
Powered - includes Cigarette Cord for Powered Whips

**519.33LRNP** \*\*  
Non-Powered for Non-Powered Whips

*Powered & Non-Powered Options Available! --> For Whips up to 8ft (2.44m)*

### Window Mount with Vacuum Assist

**519.320-V**  
Temporary heavy duty mounting solution with vacuum suction application for quick and easy install & removal of whip on vehicle. Includes Cigarette Cord for Powered Whips

*Powered & Non-Powered Options Available! --> For Whips up to 8ft (2.44m)*

### Light Duty Window Mount Bracket

**LWW-Mount**  
Light Duty Whip mounting solution for temporary install & easy removal of whip on a vehicle. For use with Light Duty ATV308/ATV375 Whips up to 7ft (2.13m)

*--> For Non-Powered Whips up to 8ft (2.44m)*

### Super Heavy Duty Magnetic Mount

**519.330**  
Heavy Duty Magnetic Whip Mount with (4) 150# pull cup magnets. Includes Cigarette Cord for Powered Whip usage.

*Maximum Speeds up to 70mph! --> For Whips up to 12ft (3.66m)*

# Heavy Duty Warning Whip Hitch Mounts

Powered & Non-Powered Options Available for Threaded, Quick Disconnect & Super Duty LED Whips!

## Standard Hitch Mounts: Powered

\* Hitch Mount options made for 2" (5.08cm) Receivers, 1.25" Receiver Mounts are available upon request

We offer a variety of Heavy Duty Standard Hitch Mounting options to support all types of our SafetyWhips® Warning Whips. Securing your Whip Assembly properly to your vehicle or equipment is essential for jobsite safety. SafetyWhips® Standard Hitch Mount collection provides multiple heavy duty mounting systems - Screw Mount for standard Threaded Whips, Quick Release Mount for Quick Disconnect Whips, or Telescoping Adapter Mount for Telescoping and Breakdown Whips.

(Non-powered, Part #: HMLTNP)

Extended Hitch Mounts Also Available for Super Duty LED Whips! (Part #: HMLSD & HMLSDA)

# Universal Platform Mounting Systems

**Complete Customizable Mounting Systems for Alternative Mounting Locations, Maximizing Vehicle & Equipment Visibility!**

**Driver Industrial Safety™ strives for the best possible safety solutions to maximize safe site operations globally.** We are constantly driving our product ideation towards improving Vehicle and Equipment visibility standards. Our SafetyWhips® Universal Platform Mounting Systems epitomize innovation by supplying your team with alternative mounting solutions for multiple standard communication devices on any type of vehicle or equipment. These mounting systems are high-strength and extremely durable; constructed of a powder-coated Steel Platform surface (for magnetic devices) and various mounting holes to securely attach all basic Safety and Communication Devices directly to the platform. Customers with non-magnetic vehicles and equipment find this solution most beneficial with it's versatility; can be installed within a vehicle's hitch (with a SafetyWhips® Hitch Mount) or mounted on the rear of a toolbox. Mounting these units are very easy and perfect for temporary use. Your outfitting possibilities are endless as we offer full customization opportunities per jobsite protocol. Simply add one of our custom NVIZN™ 3-Sided Light Duty Identification Displays, a Helios Warning Lights® heavy duty LED Beacon, then top off with a SafetyWhips® Heavy Duty Whip (up to 12ft). All mounted atop a 3ft or 5ft heavy duty for a completed system. Depend on Driver for your jobsite safety solutions!

**Aluminum-Bodied Vehicles have found their match with our Universal Platform Mount Systems!**
